Eugene, OR | Open to relocation

RESEARCH FIELDS

Behavioral economics; experimental economics and game theory; intertemporal choice and time preferences; applied microeconomics; trust and the role of AI in strategic interaction.

EDUCATION

Ph.D. in Economics 2019-2026

University of Oregon | Eugene, OR

Dissertation: "Remote Experiments in Trust and Time." Chair: Michael A. Kuhn.

Job market paper: "Time-varying Time Preferences."

M.S. in Economics conferred en route, Dec 2020.

B.S. in Mathematics and Economics (double major) 2016-2019

University of Washington | Seattle, WA

RESEARCH EXPERIENCE

Research Economist | University of Oregon, Eugene, OR Sept 2019 - Jun 2025

Behavioral economics, intertemporal choice, experimental game theory, and trust

- Designed and ran a novel longitudinal study eliciting time-varying time preferences via a custom web-based interface built for remote elicitation; found 57% of participants show time-varying behavior
- Analyzed the role of LLMs in facilitating trust in partnership games using the oTree (Python) experiment framework; found significant evidence that AI access for a trustee increases cooperative play
- Research assistant to Prof. Alfredo Burlando (Apr-Nov 2021): contributed theory and proofs to a peer-reviewed article in the *Economics of Education Review*

Consulting Economist | Vireo Rail, Netherlands (remote) Jun 2026 - Present

Advisory engagement with a Dutch rail-technology startup

- Advise on pricing analysis for an early-stage product, working with founders to scope the analytical question before committing to a method
- Designing and implementing a simulation harness for the platform, and the econometric approach for quantifying the cost savings it is meant to demonstrate

PUBLICATIONS AND WORKING PAPERS

Market Failure | w/ Van Kolpin Published

The Elgar Encyclopedia on the Economics of Competition, Regulation and Antitrust

Dec 2024

- Responsible for collection of literature; revision and editing of encyclopedia entry

Time-varying Time Preferences | w/ M. Steven Holloway, Michael A. Kuhn Job Market Paper

- Longitudinal study eliciting non-standard time preferences via a custom web interface
- Found 57% of participants show behavior consistent with time-varying preferences

[Draft Available](#)

AI-Assisted Communication, Trust, and Coordination in Human Partnerships: Evidence from a Trust Game Experiment | w/ Tanner Bivins, Ethan Holdahl, Jiabin Wu Working Paper

- Trust-game experiment with AI-assisted pre-play communication (oTree, Python)
- Found significant evidence that AI access for a trustee increases cooperative play

[Draft Available](#)

TEACHING EXPERIENCE

Lead Instructor | *University of Oregon, Eugene, OR*

Jun 2021 - Jun 2025

Instructor of record for 8 course offerings, introductory through master's level

- Full responsibility for lectures, assessments, syllabi, and course materials
- Taught both audiences the discipline serves: non-majors meeting a general requirement, and majors moving into upper-division theory
- Designed and ran my own end-of-term student exit surveys alongside the university instrument, drawing 2.5x to 5x its response rate, and carried the results into the next offering of the course

Graduate Teaching Assistant | *University of Oregon, Eugene, OR*

Jun 2019 - Jun 2025

Discussion sections, office hours, and assessment across the economics curriculum

- Led 10 discussion and lab sections of record, chiefly introductory microeconomics and an upper-division lab sequence
- Graded and held office hours for econometrics (including the Ph.D. core), microeconomics and macroeconomics, behavioral, environmental and public economics, game theory, money and banking, and international economics

COURSES TAUGHT

Instructor of record, University of Oregon

- ECON 201, Introduction to Economic Analysis: Microeconomics (Fall 2021)
- ECON 311, Intermediate Microeconomic Theory (Summer 2021, Spring 2025)
- ECON 327, Introduction to Game Theory (Summer 2022 to Spring 2024, 4 offerings)
- ECON 427/527, Games and Decisions, dual undergraduate/master's offering (Summer 2023)

Prepared to teach

- Principles of microeconomics, intermediate microeconomic theory, game theory, behavioral economics, experimental economics, introductory econometrics

PEDAGOGICAL AND OPEN-SOURCE PROJECTS

- **gametheoryst** (2025): author and maintainer of a [Typst Universe](#) package for typesetting game theory diagrams, built for classroom handouts, slides, and academic publishing
- **LOST, The Library of Statistical Techniques** (2021): original author of the ARIMA entry of an open-access statistics reference, covering background theory and an R implementation
- **AreaCodeR** (2022): open-source R project producing maps of countries by regional area code, using web scraping and geospatial methods

SKILLS

Applied Microeconomics & Methods

- Behavioral economics, experimental and game-theoretic study design, principal-agent theory
- Causal inference, A/B testing, time series analysis, multiple regression, instrumental variables
- Random forests, clustering, LASSO regularization, cross-validation and model selection

Programming & Research Tooling

- R (10+ years): tidyverse, data.table, ggplot2
- Python (4+ years): oTree experiment framework, general data and ML workflows
- Typst, Quarto (Pandoc), document tooling for slides, problem sets, and exams
- SQL, Julia, STATA, Bash/Linux, Git/version control, MS Office/Excel
