 Eugene, OR | *Open to relocation*

SUMMARY

Ph.D. economist with 8+ years of experience in applied econometrics and machine learning (causal inference, A/B testing, clustering, LASSO, random forests) using R and Python. Independently designed and ran a multi-year longitudinal behavioral study, from methodology and web-interface design through data collection and analysis, while teaching game theory and microeconomics across eight course offerings. Builds open-source tools on the side, including a Typst package published on Typst Universe.

EDUCATION

Ph.D. in Economics 2019-2026
University of Oregon | *Eugene, OR*

Job Market Paper: “Time-varying Time Preferences.” Designed and ran a novel longitudinal study eliciting non-standard, time-varying discounting behavior. M.S. in Economics conferred en route, Dec 2020.

B.S. in Mathematics and Economics (double major) 2016-2019
University of Washington | *Seattle, WA*

EXPERIENCE

Consulting Economist | *Vireo Rail, Netherlands (remote)* Jun 2026 - Present

Advisory engagement with a Dutch rail-technology startup

- Advise on pricing analysis for an early-stage product, working with founders to scope the analytical question before committing to a method
- Designing and implementing a simulation harness for the platform, and the econometric approach for quantifying the cost savings it is meant to demonstrate

Research Economist | *University of Oregon, Eugene, OR* Sept 2019 - Jun 2025

Doctoral research, University of Oregon: behavioral economics, intertemporal choice, trust, and AI

- Designed and ran a novel longitudinal study eliciting time-varying time preferences via a custom web interface; 57% of participants showed time-varying behavior
- Analyzed the role of LLMs in facilitating trust in partnership games using the oTree (Python) experiment framework; found significant evidence that AI access for a trustee increases cooperative play
- Contributed literature collection, revision, and editing for a published encyclopedia entry on market failure
- Led lab discussions, hosted office hours, and graded for econometrics, micro/macroeconomics, behavioral/environmental/public economics, and game theory as a graduate teaching assistant

Lead Instructor | *University of Oregon, Eugene, OR*

Jun 2021 - Jun 2025

Instructor of record for 8 course offerings, introductory through senior/master's level

- Prepared and administered lectures, assessments, and course content
- Taught game theory (introductory x4, senior/master's x1) and microeconomics (introductory x1, intermediate x2)
- Evaluated learning objectives using assigned materials and exams; adapted material for diverse audiences

SKILLS

Applied Modeling & Analysis

- Causal inference, A/B testing, time series analysis, multiple regression, instrumental variables
- Random forests, clustering, LASSO regularization, cross-validation and model selection
- Behavioral economics and experimental / game-theoretic study design

Programming & Data Workflows

- R (10+ years): tidyverse, data.table, ggplot2
- Python (4+ years): oTree experiment framework, general ML and data workflows
- SQL, Julia, STATA, Bash/Linux, Typst, Quarto (Pandoc)

Domain & Project Management

- Applied microeconomics, principal-agent theory
- Data governance and policy familiarity (COBIT, ITIL); PMBOK-aligned project and resource planning
- Git/version control, MS Office/Excel

RESEARCH

Time-varying Time Preferences | *w/ M. Steven Holloway, Michael A. Kuhn*

Job Market Paper

- Conducted a novel longitudinal study to elicit non-standard time preferences via a custom web-based interface
- Found 57% of participants show behavior consistent with time-varying preferences

[Draft Available](#)

AI-Assisted Communication, Trust, and Coordination in Human Partnerships | *w/ Tanner Bivins, Ethan Holdahl, Jiabin Wu*

Working Paper

- Analyzed the role of LLMs as a tool for facilitating trust in partnership games
- Found significant evidence that AI access for a trustee increases cooperative play

[Draft Available](#)

Market Failure | *w/ Van Kolpin*

Published

The Elgar Encyclopedia on the Economics of Competition, Regulation and Antitrust

Dec 2024

- Responsible for collection of literature; revision and editing of encyclopedia entry
